

SPARE PARTS SURVEY 2018

Ever wondered how much the spare parts for your car cost? And are they expensive? We have the answers to any and all your questions right here.

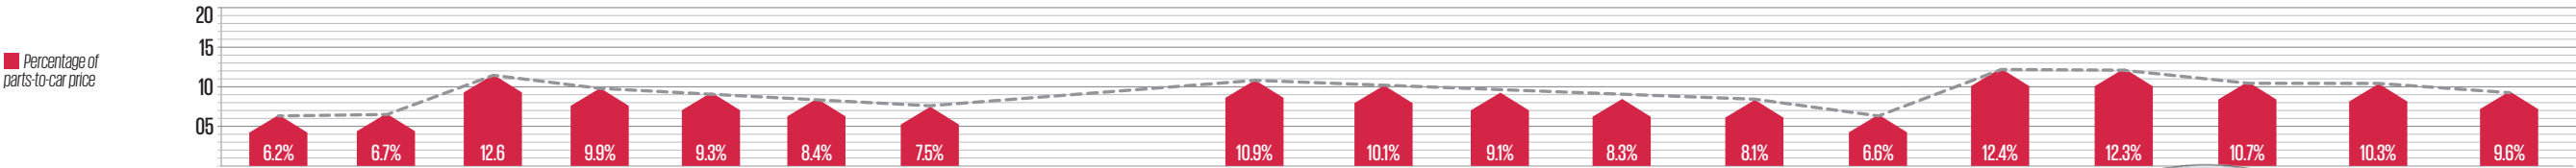

A CAR’S COMPLETE cost of ownership has a number of factors like the cost of spares, labour rates, service intervals, service life as well as the quality of parts, fuel efficiency and even depreciation. Thus arriving at the complete ownership costs for each vehicle is a tricky affair. Furthermore, nearly every manufacturer offers service packs which, for a fixed sum paid upfront, covers all the service costs over a fixed period of time and mileage.

There is, however, a very good indicator of the cost of ownership – and that’s the price of a vehicle’s spare parts. The service life of a spare part can vary between different manufacturers and also the labour rates for its replacement, but the cost of the spare itself can be used as a dipstick measure to gauge a car’s ownership cost. Enter the Autocar Spare Parts Survey – an extensive collection and analysis of the cost of spares for vehicles

on sale today. The study has been conducted over a period of around eight months and thus it is possible that a few prices might have changed by the time you read this. Here is an extract of the segments in which Ford have a presence.

MID-RANGE HATCHBACKS

Ford India’s aggressive focus on reducing the cost of ownership on its models – and also beating Maruti at its game – is quite unmistakable as the Figo petrol emerges as the car with the cheapest price basket (Rs 35,074) in this segment. Not only does it have the maximum number of ‘blues’ for key parts such as front brake pads (Rs 1,449), clutch and pressure plate (Rs 1,713) and headlight assembly (Rs 1,898), but its price basket has also dropped

by around Rs 7,000 for both the petrol and diesel model from our last survey in 2016. Among diesels too, it’s the Figo that has the lowest basket price at Rs 41,374. Next comes the Maruti Ignis (Rs 37,877), which also has a commendable number of affordable parts, followed by the Hyundai Grand i10 petrol (Rs 39,930). The new Swift, which is the country’s highest-selling mid-range hatchback, has mostly reasonably priced parts except for a few disproportionately priced items such as tail light assembly (Rs 5,120) and spark plugs (Rs 780).

High cost should be a cause for concern for Nissan and Tata. Damage to the Micra Active’s front door could set you back by Rs 10,000, and in the event of a

Figo continues to do Ford proud with the lowest-priced spares in its class.

rear collision, replacing the tailgate will cost you Rs 8,000. The slow-selling Bolt has the most expensive price basket (diesel), weighed down by expensive mechanical and accident repair parts.

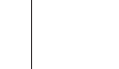

PREMIUM HATCHBACKS

The premium hatchback space is currently led in total sales by the Maruti Baleno, which has proven to be Nexa’s most successful model. Over the years, the Baleno has managed to widen the gap to its key rival, the Hyundai i20, and fortify its position in the segment. But, while the Baleno continues to set the sales charts on fire, Maruti

■ Percentage of parts-to-car price

“Maruti was yet again trumped by Ford with the Freestyle’s price basket being the cheapest.”

has yet again been trumped by Ford for the top spot in terms of affordability of its spare parts. The Freestyle petrol has the lowest price basket of Rs 39,943 and the highest number of ‘blues’ in this segment. Maruti, however, doesn’t fall

far behind with the second lowest price basket of Rs 44,242 for the Baleno petrol. The accident repair parts are affordable; like for instance, replacing the front fender will cost just Rs 1,150 and a new boot lid will set Baleno owners back by just Rs 2,850. Hyundai has done well to price its parts reasonably as the total cost of spares for the i20 petrol are not too farther away from that of the Baleno. The hatch has a decent number of ‘blues’ and not a single red. It even has the cheapest front bumper (Rs 1,441) and tail-lights (Rs 1,850).

Coming to the more expensive end of the range, the Fiat Urban Cross petrol has the highest price basket but still maintains a healthy 9.7 percent parts-to-car price

ratio. Apart from the high overall cost of spares, it also has a few extraordinarily expensive parts such as front brake pads (Rs 7,060) and clutch release bearing (Rs 7,820). So even as Fiat’s domestic sales taper off as FCA shifts focus on Jeep, the high cost of spares will definitely pinch existing customers.

Another brand – apart from Ford – whose efforts to lower ownership costs seem to have paid off is Volkswagen. Infamous for its expensive spares, VW seems to have reduced costs of its service and mechanical parts, and that has had a positive effect on the price basket. The basket price has reduced by over Rs 8,000 for the Polo 1.2 GT TSI and over Rs 8,700 for the Polo diesel, compared with our last survey in 2016. However,

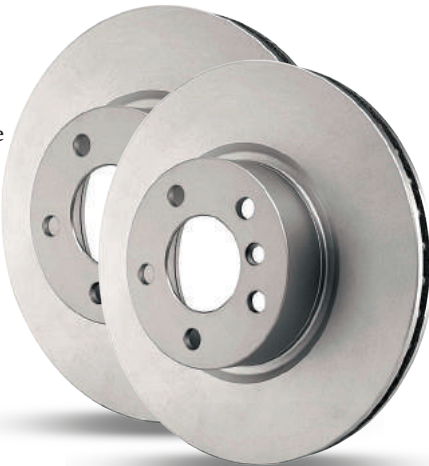

the high cost of accident repair parts means the overall basket is still pricey.

ENTRY-LEVEL SEDANS

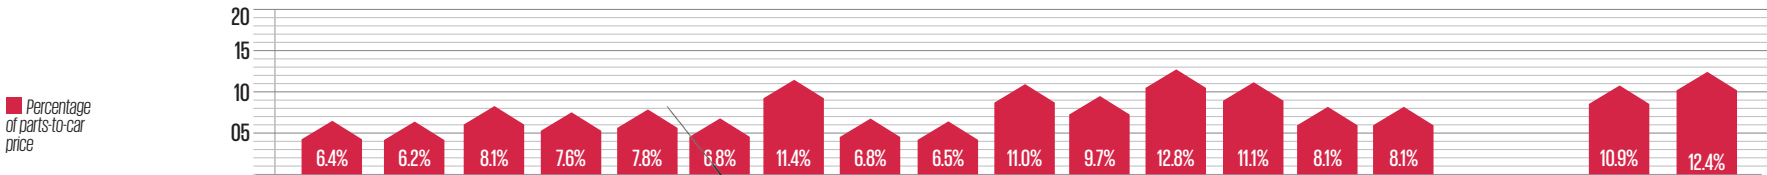

Much like the premium hatchback, sales in the entry-level sedan segment is led by Maruti with its hot-seller, the Dzire, which surpassed one lakh unit in sales for April-August 2018. Though the company’s large economies of scale enable it to price the Dzire’s spares reasonably, the basket price of the Dzire petrol (Rs 38,230) cannot match up to the affordability of the pre-facelift Ford Aspire petrol (Rs 36,350). As a result, the Ford once again outscores Maruti in spare parts affordability.

The Aspire has the highest number of blues in the mechanical

spare parts category, for parts such as AC evaporator coil, clutch and pressure plate, as well as a few others such as brake pads, headlight assembly and side mirror. The Dzire, meanwhile,

Segment winner, the Aspire has a basket price well under half that of the most-expensive Verito.

gains in the accident repair parts category; it has the cheapest bonnet, radiator (only diesel), front door and tailgate.

The Aspire and Dzire are followed by the Hyundai Xcent and the Amaze, both of which have a fairly affordable set of spare parts. The Xcent features the cheapest air

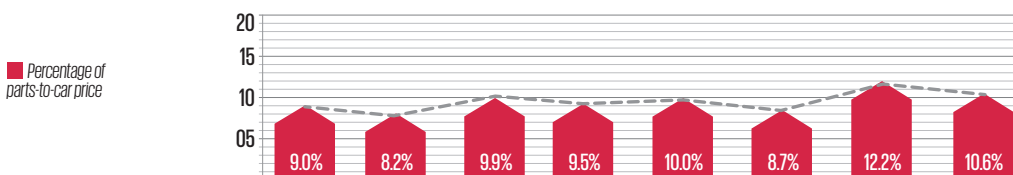

filter, tail-light assembly and front bumper, while the Amaze has the cheapest wheel rim.

At the pricier end of the basket price spectrum sits the Mahindra Verito, costing a steep Rs 85,405 (more than twice that of the Dzire), on account of its pricier accident repair parts. Its front door, for instance, costs a whopping Rs 11,207, while replacing the front bumper will set you back by Rs 4,668.

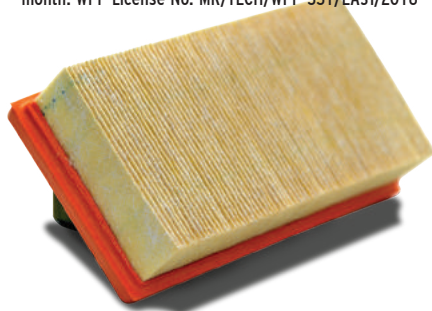

COMPACT SUV

The compact SUV segment has seen new entrants with the Tata Nexon and Honda WR-V, but action regarding the spare parts pricing remains with the two stalwarts – the EcoSport and the Brezza with baskets amounting to RS 69,376 and Rs, 66,727

Newcomers WR-V and Nexon have pricier spare parts compared to the EcoSport.

respectively. Interestingly, both Ford and Maruti have slashed their spare prices when compared to our earlier study. The Brezza prices have dropped by nearly Rs 7,000, while the EcoSport diesel has seen a reduction of around Rs 2,500.

The Honda WR-V comes in with the highest costs with a total of Rs 84,716, followed closely by the Mahindra TUV300 at Rs 82,790 – an increase of just Rs 1,000 from our last survey.

PREMIUM SUVs

While old rivals, the Ford Endeavour and the Toyota Fortuner battle it out, they are joined by the Skoda Kodiaq and Volkswagen Tiguan. The former set uses the more traditional body-on-frame construction, while the latter pair are car-based, crossover-style SUVs and it's these two that have the highest part prices. Nevertheless, they stand close to the Fortuner that comes in third. Ford has once again emerged victorious with both the 2.2 and 3.2-litre Endeavour coming in with the lowest-priced spares. At Rs 3,02,590, there is over Rs 1 lakh separating the 3.2-litre Endeavour and the Kodiaq. **AI**
